

## THE SMARTEST TECHNOLOGY FOR THE SMARTEST HOMES

No one is doing more to make windows and patio doors part of today's smart home than Andersen. Andersen Connect products include patented VeriLock® wireless security sensors, which can be integrated with our hardware. These sensors not only tell you if a window or patio door is open, but also if it's locked or unlocked\*. No other sensors can do that.

### CONNECTED HOME

Now you can monitor your windows and doors when you're away from home like you can monitor your thermostat or lighting.†

### PRESERVES BEAUTY

VeriLock sensors come in a variety of colors to complement many Andersen® hardware and interior finishes.

### HELPS MAXIMIZE ENERGY EFFICIENCY

Windows that are closed, but unlocked lose air at a rate up to 3X that of a closed and locked window.\*\* VeriLock sensors tell you which windows and doors are open or unlocked\* so you can manage your units for maximum energy efficiency.

### MAINTAINS WARRANTY

Other sensors require drilling which can void warranties. Our sensors require no drilling and come with their own limited warranty†

### QUICK, EASY INSTALLATION

If you already have Andersen products, VeriLock wireless security sensors can be easily integrated with the hardware.

Whether for new windows and patio doors or those already installed in your home, VeriLock sensors are available for the following Andersen products: 400 Series, A-Series, E-Series and 200 Series††

\*When properly configured and maintained with a professionally installed security system and/or self-monitoring system compatible with Honeywell® 5800 controls. See your dealer for more information.  
\*\*Based on testing of (32) A-Series double-hung windows. Air loss through unlocked windows will vary based on window type and age, pressure differential, temperatures inside and outside the home, altitude and application.  
†Visit [andersenwindows.com/warranty](http://andersenwindows.com/warranty) for details. ††200 Series gliding patio doors only.

Bold name denotes finish shown.

## MONITORING

### A MONITORING OPTION FOR EVERY HOME AND LIFESTYLE

Andersen has teamed up with leading professional monitoring and self-monitoring companies so you can easily access your window and patio door status in the way that works best for you.

If you're unsure which monitoring method is right for you, our sensors can be included with your order of Andersen® windows and patio doors now and connected to a professional security service or to a self-monitoring service at a later date.\* For more information on monitoring options, watch our videos at [andersenwindows.com/connect](https://andersenwindows.com/connect).

### COMPATIBILITY

Self-Monitoring

Professional  
Monitoring
