INTRODUCE YOUR HOME WITH UNCOMMON ELEGANCE.
Custom Springline™ shown in mahogany with custom sidelights, transoms and grilles.

*Actual wood species is either Sapele or Sipo, both non-endangered species grown in Africa with color and characteristics similar to Central American mahoganies. Hardware by others unless noted.
Handcrafted from the finest wood available, Andersen® entranceways introduce your home with uncommon elegance. They showcase artistry, intricacy and exceptional beauty to complement the character of your home and those who live inside. For more information, visit andersenwindows.com/entrydoors.

Dramatic shapes and sizes enhance your home’s architecture.

A wide variety of glass options offer efficiency and beauty. Decorative glass options available.

Grilles in standard or custom patterns. Optional handle hardware in a variety of styles and finishes.

Choose from the very finest grades of oak, maple, cherry, pine, mahogany, alder and vertical grain Douglas fir or for low maintenance, select an extruded aluminum-clad exterior to complement your home’s exterior.

Stunning sidelights and transoms open a home to light and add a dramatic flair.

Hardware by others unless noted.
Sidelights & Transoms

To provide a seamless alignment with Straightline or Arts and Crafts style entry doors, sidelights and transoms are available with the glass built directly into the frame (direct-set) or with glass aligned to the door stiles and rails (sash-set). Sash-set transoms are available with a single or double sash.

Left: Straightline (193) shown in mahogany* with sidelights (183), beveled glass and custom grilles. Elliptical transom with custom art glass.

Right: Straightline (181) shown with sidelights (183), transom and custom grilles with white interiors. Hardware by others unless noted.

*Actual wood species is either Sapele or Sipo, both non-endangered species grown in Africa, with color and characteristics similar to Central American mahoganies.
Sidelights and transoms can complement an entry door or completely transform the look of the entire home. These charts demonstrate the range of configurations available for rectangular single and double doors. Sidelights and transoms can be used in nearly any combination, allowing arched openings to be filled with rectangular doors and arched transoms, and creating a world of possibilities for what was once a simple doorway.

Features & Options

Tempered High-Performance
Low-E4® glass is standard. Tempered High-Performance Low-E4® Sun glass is also available for added energy efficiency.

Engineered timber stiles and rails in the door panels provide strength and stability. Choose from two standard panel thicknesses: 1 3/4" and 2 1/4".

Panel interior surfaces are unfinished wood veneers. Available species are pine, oak, maple, alder, cherry, vertical grain Douglas fir and mahogany.*

Heavy-duty extruded aluminum cladding protects the panel exterior, providing low maintenance and durability. Wood exteriors are also available to meet any entry door style needs.

Exterior panel mouldings are standard on most panels. Optional raised mouldings are also available on panel interiors and exteriors for added visual definition and style.

Standard 4 9/16", 5 1/4", 6 9/16" and 7 1/8" jamb depths are available to match the thickness of most walls. Custom jamb depths are also available.

Entry doors are available in both inswing and outswing configurations.

Sill Options
Standard extruded aluminum sill is thermally broken and available in painted bronze or gray finish. Its innovative sill design provides superior water management. Outswing sills have a standard oak cap or choose from optional maple or mahogany.* Inswing sills have an interior wood trim strip that matches the interior finish.

An optional low-threshold thermally broken sill is available on outswing doors in a standard mill-finish. Bronze anodized finish is also available. Its innovative dam design helps resist water infiltration. The sill can also be extended to the interior for various wall conditions.

Weatherstrip
Flexible foam weatherstripping around the door perimeter, combined with a sweep watershed on the bottom of the panel, helps resist wind and water. Outswing doors include an additional rain skirt for greater protection against wind-driven rain.

Door Heights & Widths
Two standard heights, 6'8" and 8'0", and two standard widths, 3'0" and 3'6", are available for most doors. Custom heights and widths are also available. Heights and widths shown are nominal. For actual unit and rough opening dimensions, contact your Andersen dealer.

Warranty
Our limited warranty is non-prorated and fully transferable, maintaining its value throughout the coverage period, even if the property changes ownership. The limited warranty for Andersen® entranceways covers glass for 20 years. Decorative insulated art glass and non-glass parts are warranted for 10 years, with the exceptions of unclad door panels and doors used for commercial purposes, which are covered for 5 years. For details, please request a copy of the complete limited warranty from your dealer.

*Actual wood species is either Sapele or Sipo, both non-endangered species grown in Africa, with color and characteristics similar to Central American mahoganies.
Wood Species

The finest grades of pine, maple, alder, cherry, oak, vertical grain Douglas fir and mahogany are standard. Other wood species may be available through special order. Species can be varied on the interior and exterior. Many entry doors are also available with aluminum-clad exteriors.

Brick Mould

Seven widths of exterior brick mould and nine profiles are available in pine, maple, alder, cherry, oak, vertical grain Douglas fir and mahogany. Curved and lineal options are also available. Aluminum-clad brick mould options are available to match entranceways with clad exteriors.

Interior Casings

Interior casing are available in 19 profiles in accenting pine, maple, alder, cherry, oak, vertical grain Douglas fir and mahogany. Curved and lineal options are available.

*Actual wood species is either Sapele or Sipo, both non-endangered species grown in Africa, with color and characteristics similar to Central American mahoganies.
*Actual wood species is either Sapele or Sipo, both non-endangered species grown in Africa, with color and characteristics similar to Central American mahoganies.
Andersen® entry doors give you a multitude of hardware options. They can be predrilled for handle sets, knob sets and lever sets to accommodate most architectural styles and most manufacturers’ designs. You can also choose lock and trim sets to match your Andersen window and door hardware. With the exception of our Tribeca® and Albany styles, all are forged from the finest brass and finished in brass, bronze, chrome or nickel. Tribeca and Albany hardware is made from die cast zinc with low-maintenance finishes. All Andersen lock sets work with both single-point locking systems and multi-point locking systems, which secure the door panel at the top, middle and bottom.

**Hinges**

Standard ball-bearing hinges are available in stainless steel, white, polished brass and dark bronze.

**After Market Hardware**

For hardware manufactured by others, doors can be ordered predrilled for easy on-site installation. They can also be specified without hardware drilling.

Art Glass

Art glass adds color and beauty to your entranceway, while allowing you to make a truly individual statement. It is available for all Andersen® entranceways and patterns can be modified to accommodate the size or shape of any glass area. For maximum energy efficiency and stability, art glass panels are permanently sealed between the insulating glass panes. Patterns, in addition to those shown below, are also available as custom designs. Ask your Andersen supplier for details.

The four styles included in our Classic Series™ panels represent major architectural design themes from the late 1800s through the 1930s. Their symmetric patterns are available in distinctive color schemes as well as colorless glass, and their caming may be finished with a gold tone, silver tone or antique patina. Patterns can be modified to accommodate the size and shape of your chosen glass area.

Springline™ (213)
